

LapangKu Guide

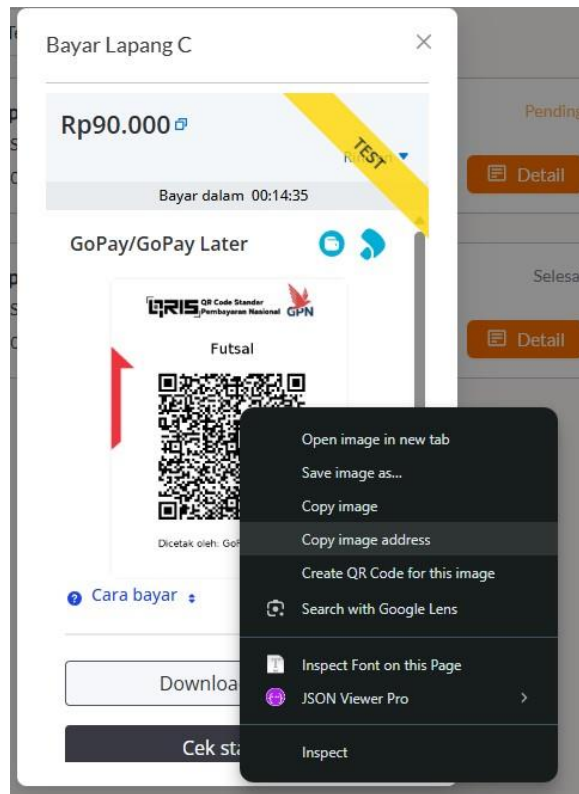

Payment

Because LapangKu is just an example, the payment feature is still in sandbox (test) mode. In other words, the app doesn't yet support real-world payments. If you want to use this feature, I recommend choosing Gopay/Gopay Later payment, as it has been thoroughly tested.

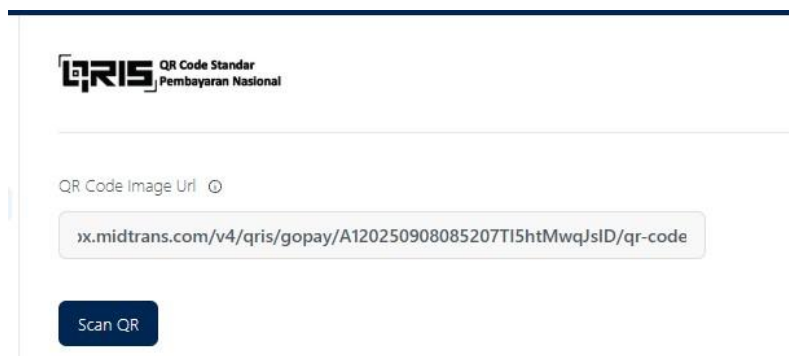

To start, just click Gopay/Gopay Later payment

Then Click it, and copy the qr code url by right click on it.

After that, open the payment simulator at <https://simulator.sandbox.midtrans.com/v2/qris/index>, then copy the url copied before.

Finally, click the Scan QR button to make the payment.
